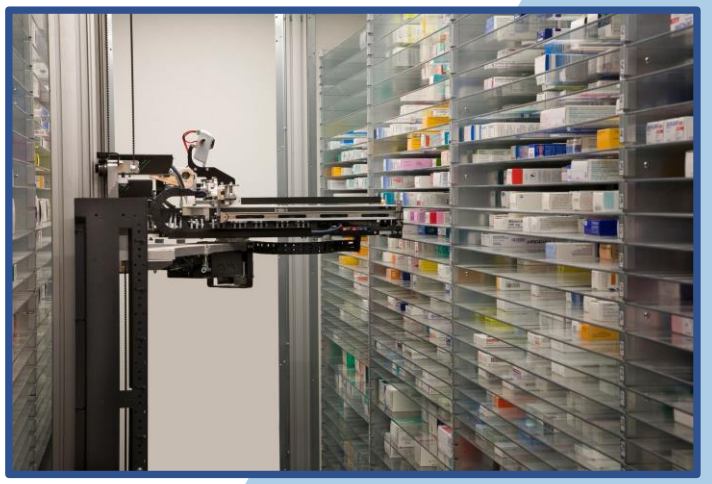
Solutions

Pharmacy Automation



Self-Service Robotic Pharmacy

Model A

Outdoor

Public areas

- *Parking lots*
- *Communities*

Model B

Indoor

Public Areas

- *Metro Stations*
- *Commercial Complexes*
- *Shopping Malls*

Self-Service Robotic Pharmacy

WorkFlow

- Simple and user-friendly workflow
- Support different workflows Prescriptions, OTCs and Online Orders

Convenient

- Controlled door for medication delivery
- Payment system
- Support multi languages
- e-signature capture

Patient Centricity

- Patient identification by national ID
- Video conference with pharmacists for consultation
- Automatic patient profile updates

Integration

- Integration capabilities with dispensing robotics, HIS, ERP, Billing systems

Needs of Improvement in the Outpatient Pharmacy

Enhance Patient Experience
More convenient, better service
and patient education focus
24/7 service

Operation Cost Reduction
Number of pharmacists/technicians
Home delivery service fees
Inventory management and supply chain
Facility management

Improve Outreach Strategy
Scalable, Modular and mobile
network,

New revenue stream
OTC, Vitamins and supplements

Automated Inventory Management
Avoid stock shortage
Reduce the waste
Reduce the average inventory ,

Capacity Increase
Ready to serve new patient's
categories and meet the population
growth requirements

Reduce the medication waste
Using fully robotic machines
for stock management,

Enterprise Support
End to end solution
Central management, Scalability,
Management dashboard

PharmaFlow™ Platform

PharmaFlow™
Intelligent Pharmacy Automation

This innovative solution streamlines medication management, enhances patient safety, and optimizes pharmacy operations. Its transformative approach ensures efficient workflows and improved healthcare outcomes, setting a new standard in pharmacy technology.

For outpatient pharmacy: it not only improves operational efficiency but also enhances patient engagement, safety, and satisfaction.

For inpatient pharmacy: the system features work together to create a highly efficient and safe environment for inpatient pharmacy management, reducing manual workload, minimizing errors, and improving patient outcomes.
